NameWish: Discover Baby Na...
Perfect baby name finder

ZeloopTech Lifestyle

Swipe to explore names and mark them liked or disliked

Share liked names with your partner.

Apply filters to the name swap list.

namewish: discover ba ⊗   ✕

10. Finding the app was easy. When downloading it took 8min and was just circling and circling then it went straight to open. Usually the blue indicates the progress of update. Maybe just my phone.
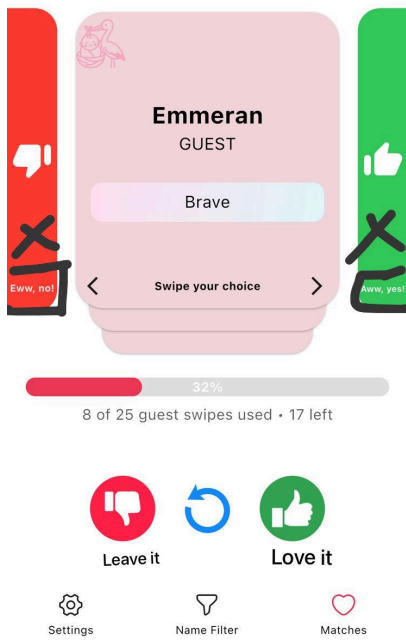

11.

This could be cuter Eg. Swipe and discover the name you have always Wished for.

Share liked names with your partner and see your wishes come true. Something that brings the wish element in.
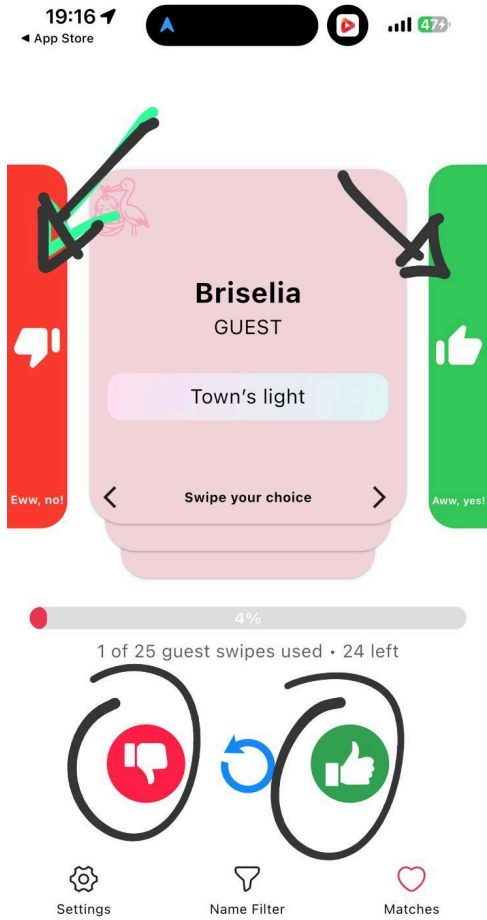

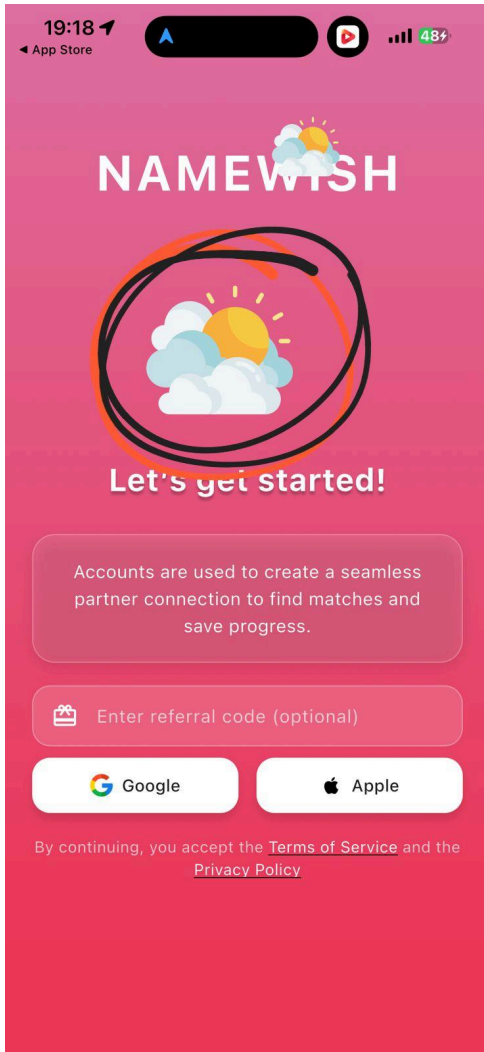

12.
Don't think it's necessary to have double thumbs both beside the name and at the bottom it looks abit to busy and messy.

13.
Move the eww no! And Awww yes! To the bottom of the thumbs . I think. The red and green over takes the pink and throws it off

14.

I did a referral to @+971 58 547 9118 did you get it bae? so we know if it works and how does it look? Also I can sign up by apple and google. Not sure if it's wanted like this but sometimes most apps ask also email. This pink should be consistent with the brand Pantone shade and logo of Namewish.
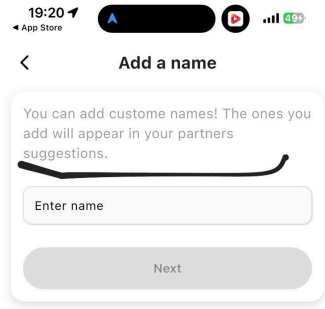

15.   It would be cool if you added a name and it went into the pile of swipes to your partner and family but they don't know it's from you and visa versa they can add names and it goes into the swipe pile and you see if you match with anyone from your family and partner. Maybe complex 😊
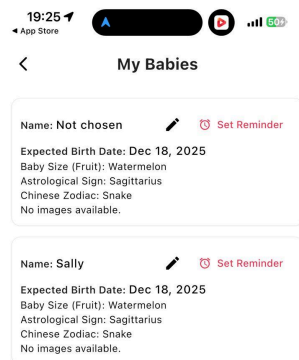

16.   If I make a mistake I can't delete. Even when I push pencil and it right swipe no delete option available. I also think I just figured out this feature. It's to know the size & sign. I'd choose a more relevant header. "See my baby grow"
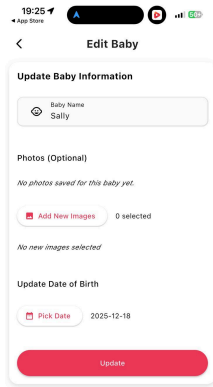

17.   When I update it just stays on the page and says update. I ended updating a couple of times as it's not so clear if it's updated and or sometimes when you update it will redirect to main page or it will indicate updated.
